Throughout all my job experience, I have acquired different sets of skills that pertain to customer service, technology and sales, all of which positively represent each company I've worked for. I strive to learn at a high level and will be a team player on any assignment I am appointed to. Currently I am attending the University of Utah's full-stack software development bootcamp. At my current job I am part of the companies mentorship program where I am a mentee, learning Ruby on Rails.
